Register here to get ebay appld

Note then ebay AppId ,CertId and DevId for further use. After getting AppId,CertId and DevId ,Now we require Ebay User Token .It can be obtained by clicking on “Configure Settings” .

The screenshot displays the eBay developer console interface. It is divided into several sections:

- member information**: Shows user details like 'User Name: sampleapi' and 'Company: software systems'. Action links include 'Change Password', 'Manage Member Profile', and 'View Public Profile'.
- application keys**: This section is further divided into 'Sandbox Keys' and 'Production Keys'. Each key set (e.g., 'Key Set 1') lists 'Name', 'DEVID', 'AppID', and 'CertID'. A 'Configure Settings' link is present for each key set.
- License information**: Contains an 'Important eBay API License Update' with links to 'Please read API License (PDF)'.
- Support Hours**: Provides links to 'Forums', 'Documentation', and 'Quick Start Guide'.
- Compatible Application Check**: A notice stating that the application has not passed a compatibility check and provides a link to 'Compatible Application Check'.

Red and blue annotations are present on the 'Production Keys' section:

- A red box highlights the 'Name', 'DEVID', 'AppID', and 'CertID' fields for 'Key Set 1'.
- A blue box highlights the 'Configure Settings' link for 'Key Set 1'.
- A red arrow points from the blue box to the text: 'Click on Configure settings to create User token'.

After opening the settings page you can see User Tokens .Click on hyperlink “Getting Tokens” follow the instructions and create user token.

application settings

Configure your application settings for the features described in each section. Remember that these settings apply to the environment and specific set of keys that you choose below. For more information about application-level settings, see 'Set Application-Level Settings'.

1) Select an environment.

Production

2) Select a key set.

Key Set 1
