Installation:

Steps to install this extension

We recommend creating a backup of your site before installing any new extension, especially if it is a live site

- Please make sure you've downloaded extension package compliant with your magento version. The Compliance information is stated in the package filename. Once you've downloaded and unzipped the archive.
- Upload the contents of the module package to the **Magento root folder**. This will not overwrite the existing Magento folders or files, only the new contents will be added.

Magento root folder directory structure looks like, <http://www.techflirt.com/tutorials/magento-tutorial/magento-directory-structure-files.html>

- After uploading is done, Log in your Magento administration panel to refresh cache by way go to **System > Cache Management**. Select all caches and take action “**Refresh**” then submit.
- You can check whether the module is enabled or not in Admin area. Go to **System > Configuration**, under configuration select “Advanced” >If the Module is Enabled You can see option “Enable” for “Mg_Dealer”.

UnInstallation:

In Admin area, go to **System > Configuration**, under Configuration select “Advanced” >Click on Disable Modules Output and select “Disable” for “Mg_Dealer” and click **Save Config** button Clear the store cache under **System > Cache Management**.
